Armored Komodo (ArKom) began in 2017 as a result of our founder's exasperation in looking for a hobby grade paint he intended to use for a Gundam competition that year. The existing paints then were either expensive or were incomplete and had to be waited on for several weeks before what's needed became available. A need to provide local scale modelers an affordable, complete and easily accessible set of hobby grade paint was identified.

Our Mission

To bring out everyone's creativity, one hobby grade paint bottle at a time

Our Vision

To be the first Filipino brand providing the biggest selection of scale model paints and auxiliaries with a global reach

C O N T E N T S

Hobby Supplies Water-Based Paints

- 04 Water-Based Acrylics
- 16 Premium Water-Based Acrylics
- 17 Water-Based Metallics
- 19 Fantasy Water-Based Metallics
- 21 Water-Based Inks
- 22 Water-Based Transitions
- 26 Fantasy Water-Based Wash
- 27 Water-Based Wash
- 29 Water-Based Panel Liners

Water-Based Auxiliaries

- 31 Water-Based Primers & Topcoats
- 32 Water-Based Auxiliaries
- 34 Water-Based AB Auxiliaries

Lacquer Paints

- 36 Basic Colors Lacquer
- 41 Military Colors Lacquer
- 56 Metallics Lacquer
- 59 Clear Paints
- 60 Candy Chrome
- 61 Premium Chameleon

Lacquer Auxiliaries

- 63 Lacquer Primers 50 ml
- 64 Lacquer Primers 250 ml
- 65 Lacquer Thinner & Cleaner
- 66 Lacquer Topcoats

Pigments

- 68 Chromaflair Pigments
- 71 Chromaflair Auxiliaries
- 72 Weathering Pigments

PH906

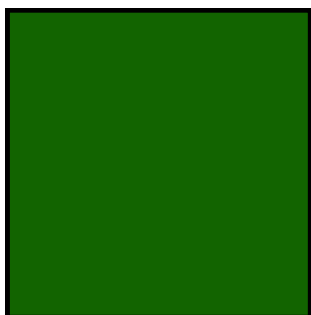

PH907

PH173

PH174

PH178

PH171

GLOSS THINNER

- ▶ High quality thinner for water-based paint.
- ▶ Used for increasing fluidity of water-based paint.
- ▶ Used for delaying drying time of water-based paint.

PH172

FLAT THINNER

- ▶ Used for increasing fluidity of water-based paint.
- ▶ Used for delaying drying time of water-based paint.
- ▶ Has flattening additives to make water-based paint achieve a matte finish.

PH177

RETARDER

- ▶ Paint additive for water-based acrylic paints.
- ▶ Delays drying time of paint even further allowing for more time to blend colors.
- ▶ Prevents tip dry on airbrushes when spraying waterbased acrylic paints.

PH176

FLOW IMPROVER

- Paint additive for water-based acrylic paints.
- Loaded with surfactants, this increases the flow of paint over a surface by reducing surface tension.
- Recommended when doing filters or glazes.

PH838

TRANSITION PAINTS MEDIUM

- The medium will allow you to thin Transition Paints further and lessen the opacity without affecting the paint's properties.
- Adding water alone is not suitable as the water's surface tension will affect the paint's flowing properties .
- It will also allow you to create glazes while keep the paint's original durability.

PH918

WATER-BASED THINNER MEDIUM

- Made for Arkom's regular water-based acrylics and inks, the medium will allow you to thin the paint further and lessen the opacity while still retaining the paint's properties. Adding water alone is not suitable as the water's surface tension will affect the paint's flowing properties . It will also allow you to create glazes while keep the paint's original durability.

WATER-BASED CLINNER

- Recommended thinner for ArKom water-based acrylics especially for airbrushing.
- 2-in-1 product formulation, works as thinner and airbrush cleaner for ArKom water-based acrylics.
- It makes ArKom water-based acrylics behave like lacquers during airbrush applications making airbrushing ArKom acrylics very easy to spray.
- Test before using with other water-based acrylic brands for compatibility.

LACQUER THINNER FAST DRY

- Fast Drying Hobby grade thinner for scale modelling use.
- Use for thinning lacquer type hobby paint Absolutely plastic safe.
- Compatible with Arkom, Gaianotes, AK Interactive Real Colors, Mr. Hobby, Tamiya Lacquers and Tamiya Acrylic.
- Don't use with hardware/paint shop automotive paints.

PH349

LACQUER THINNER RETARDER TYPE

- Slows drying time of paints for better self levelling.
- Hobby grade thinner for scale modelling use.
- Use for thinning lacquer type hobby paint.
- Absolutely plastic safe Compatible with .
- Don't use with hardware/paint shop automotive paints.

PH49

AIRBRUSH CLEANER LACQUER

- Highly recommended for cleaning lacquer paints from airbrushes.
- Use for thorough cleaning of airbrush cups and needles.
- Used for cleaning lacquer and other solvent type paints only.
- Powerful cleaning action , quickly removes paint in the cup and inner airbrush system.
- Do not use as thinner for painting as it may damage plastic models.

► High quality acrylic binder to mix with pigments and create a paste consistency to fix on a surface and create textures and other weathering effects such as mud, accumulated dust, crusted earth, splatters etc.

► Can also be handbrushed on a surface and dries to a clear and tacky layer. Once dry, brush on pigments to permanently adhere them to the surface to simulate thin layers of dust, rust, etc.

OIL AUXILIARIES

PH744

PH745

PH747

PH748

PH746

- Drying accelerator for Arkom's Oil Paints

Add only in small amounts, a drop will usually be enough already.

- Recommended when oils need to dry faster.

► Can be airbrushed on top of an oil paint layer to remove tackiness.

PH743

PH605

MS REGULAR

- Perfect for use in blending, streaking, thinning and cleaning enamel and oil based paints
- Used for cleaning panel lines when using enamel based wash.

PH742

PH606

MS FAST DRY

- Perfect for use in blending, streaking, thinning and cleaning enamel and oil based paints.
- Weaker than the regular version, you can use this for soft and subtle blending.
- Dries in seconds.
- Used for cleaning panel lines when using enamel wash.

OTHER AUXILIARIES

PH229

ARUKORU

- Used for stripping lacquers, enamels and waterbased acrylics.
- Also used for sanitizing surfaces, make up tools, etc.

PH231

MS. SMELLY CLEANER

- Used for cleaning airbrush after using water-based acrylics.
- Brush cleaner and restorer after using water-based acrylics will remove acrylics, enamels and lacquers.

PH228

SEAMLINE DESTROYER

- Use for filling seams, cracks and other imperfections on your model kit dries in 15 minutes.
- Has self levelling properties, seeks out gaps and fills it on its own.

PH608

LIGHT CHIPPING FLUID

- ▶ A Waterbased liquid recommended for creating light chips and scratches faster.
- ▶ Can be applied using an airbrush or handbrush.
- ▶ Apply liberally on a basecoat, let dry then apply your final color. Once the final color is dry, dampen it with water to activate the chipping fluid layer then do the chipping and scratches using a stiff brush, sponge, toothpick etc.

PH609

HEAVY CHIPPING FLUID

- ▶ A waterbased liquid recommended for creating heavy chips and scratches faster.
- ▶ Can be applied using an airbrush or handbrush.
- ▶ Apply liberally on a basecoat, let dry then apply your final color. Once final color is dry, dampen it with water then do the chipping and scratches using a stiff brush, sponge, toothpick, etc.

PH635

PLASTIC CEMENT REGULAR

- ▶ Thin metal nozzle tip for accurate dispensing.
- ▶ Will bond styrene, ABS and acrylic plastic.
- ▶ Regular type, has better capillary action compared to the fast drying version, recommended for sealing seam lines.

PH636

PLASTIC CEMENT FAST DRY

- ▶ For assembly of plastic scale models.
- ▶ Thin metal nozzle tip for accurate dispensing.
- ▶ Will bond styrene, ABS and acrylic plastic.
- ▶ Fast Drying, recommended for scratch building and kitbashing works that need fast setting action for parts being bonded.

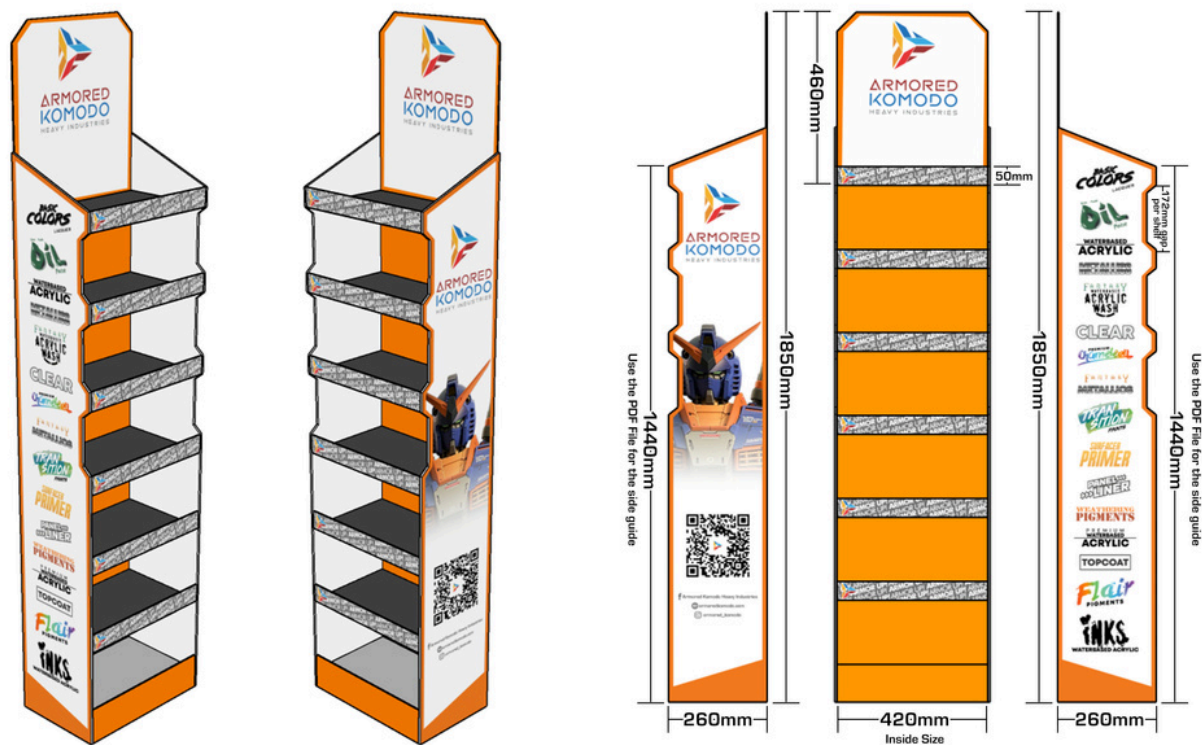

PH607

LIQUID MASK

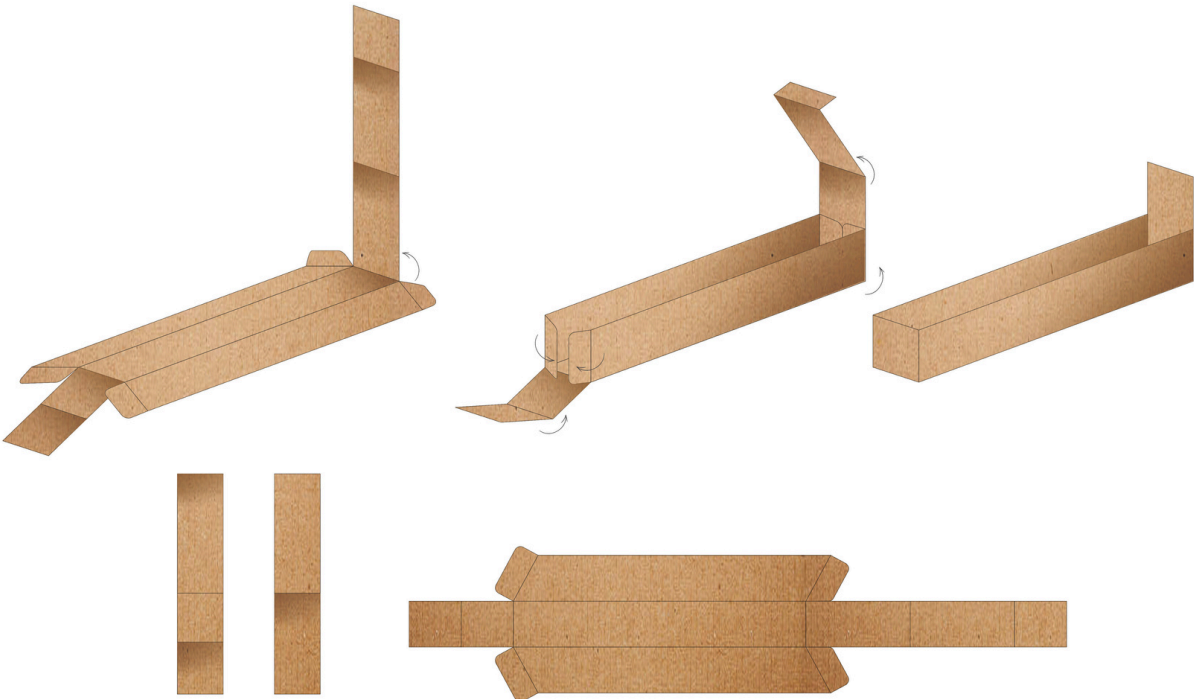

- ▶ A waterbased handbrushable liquid mask recommended for masking irregular shapes where a regular masking tape would be impractical.
- ▶ Apply using a brush or by using the tip of the nozzle like a pen.
